CLAIMS

WHAT IS CLAIMED IS:

- 1. An article having a decorative coating provided thereon, the article comprising:
- a substrate having a surface; and
- a material comprising scandium provided over at least a
- 5 portion of the surface to thereby form a decorative coating which exhibits
- 6 a desired color.
- 2. The article of claim 1, wherein the material comprising scandium further comprises nitrogen.
- 3. The article of claim 1, wherein the material comprising scandium further comprises at least one of carbon and oxygen.
- 1 4. The article of claim 1, wherein the material comprising 2 scandium comprises at least 10 atomic percent scandium.
- 5. The article of claim 1, wherein the material comprising
- 2 scandium further includes at least one metal selected from the group
- 3 consisting of zirconium, titanium, yttrium, niobium, hafnium,
- 4 molybdenum, chromium, and aluminum.
- 1 6. The article of claim 5, wherein the material comprising
- 2 scandium includes nitrogen.
- 7. The article of claim 5, wherein the material comprising
- 2 scandium includes at least one of carbon and oxygen.

- 1 8. The article of claim 1, wherein the material comprising
 2 scandium includes at least one metal selected from the group consisting
 3 of lanthanum, neodymium, praseodymium, samarium, dysprosium,
 4 erbium, ytterbium, and cerium.
- 9. The article of claim 8, wherein the material comprising scandium includes nitrogen.
- 1 10. The article of claim 8, wherein the material comprising scandium includes at least one of carbon and oxygen.
- 1 11. The article of claim 1, wherein the material comprising scandium is configured to provide at least one of abrasion resistance, scratch resistance, tarnish resistance, and corrosion resistance for the substrate.
- 1 12. The article of claim 1, wherein the material comprising scandium has a thickness effective to provide the desired color.
- 1 13. The article of claim 12, wherein the thickness is greater than approximately 50 nm.
- 1 14. The article of claim 13, wherein the thickness is greater than approximately 100 nm.
- 15. The article of claim 1, further comprising a strike layer provided intermediate the substrate and the material comprising scandium.
- 16. The article of claim 1, wherein the strike layer comprises scandium.
 - 17. An article having a decorative coating comprising:

1

:

- a substrate having a surface; and
- a compound provided over at least a portion of the surface,
- 4 the compound comprising scandium.
- 1 18. The article of claim 17, wherein the compound comprises
- 2 scandium nitride.
- 19. The article of claim 17, wherein the compound further
- 2 comprises at least one of carbon and oxygen.
- 1 20. The article of claim 17, wherein the compound includes at
- least one metal selected from the group consisting of zirconium, titanium,
- 3 yttrium, niobium, hafnium, molybdenum, chromium, aluminum,
- 4 lanthanum, neodymium, praseodymium, samarium, dysprosium, erbium,
- 5 ytterbium, and cerium.
- 1 21. The article of claim 20, wherein the compound includes
- 2 nitrogen.
- 1 22. The article of claim 17, wherein the compound includes at
- least one of carbon and oxygen.
- 1 23. The article of claim 17, wherein the compound is configured
- to provide at least one of abrasion resistance, scratch resistance, tarnish
- 3 resistance, and corrosion resistance for the substrate.
- 1 24. The article of claim 17, wherein the compound has a
- thickness greater than approximately 50 nm.
- 1 25. The article of claim 24, wherein the compound has a
- thickness greater than approximately 100 nm.
 - 26. An article of manufacture comprising:

1

a substrate having a surface; and

a compound comprising scandium and at least one additional

4 element deposited on the surface, the compound configured to provide a

5 decorative color coating for the article;

6 wherein the at least one additional element is selected from

the group consisting of nitrogen, oxygen, carbon, and a metal;

wherein the color provided by the compound may be

adjusted by changing the amount of the at least one additional element in

the compound.

9

- 1 27. The article of claim 26, wherein compound includes at least
- 2 two additional elements selected from the group consisting of nitrogen,
- 3 oxygen, carbon, and a metal.
- 1 28. The article of claim 27, wherein the color provided by the
- 2 compound may be adjusted by changing the relative amounts of the at
- 3 least two additional elements.
- 1 29. The article of claim 26, wherein the compound comprises
- 2 scandium and nitrogen.
- 1 30. The article of claim 29, wherein the compound further
- 2 comprises at least one of oxygen, carbon, and a metal.
- The article of claim 26, wherein the compound comprises a
- 2 metal selected from the group consisting of zirconium, titanium, yttrium,
- niobium, hafnium, molybdenum, chromium, and aluminum.
- 1 32. The article of claim 31, wherein the compound further
- 2 comprises nitrogen.

- 1 33. The article of claim 26, wherein the compound comprises a
- 2 metal selected from the group consisting of lanthanum, neodymium,
- praseodymium, samarium, dysprosium, erbium, ytterbium, and cerium.
- 1 34. The article of claim 33, wherein the compound further comprises nitrogen.
- 35. The article of claim 26, further comprising a strike layer provided intermediate the compound and the substrate, the strike layer comprising scandium.
- 36. The article of claim 26, wherein the compound is deposited at a thickness greater than 50 nm.
